

Strategic objectives with 10-year ambitions

Maximising cancer prevention	Enhanced consumer experience	World class health systems for optimal care	Strong and dynamic foundations	Workforce to transform the delivery of cancer care
A cancer control system that seeks to eliminate racism, proactively reduces cancer risk and supports all Australians to access personalised, evidence-based cancer prevention and screening strategies	People affected by cancer are partners in culturally safe, equitable and responsive cancer care, and health services and systems are trusted and supported for optimal experience, quality of life and cancer outcomes	Integrated, coordinated, data-driven, high-quality health service systems that consistently deliver optimal cancer care and excellence in outcomes	A modern, fit-for-purpose and agile cancer control infrastructure, advanced by the innovative application of technology, research and data to improve Australia's cancer control system and outcomes	An engaged, capable and sufficiently future-focused cancer workforce that is culturally safe and responsive, well-equipped, well-supported and driven by collaboration, continuous improvement and diversity to enable the best care for all Australians affected by cancer

Achieving equity in cancer outcomes for Aboriginal and Torres Strait Islander people

Supporting Aboriginal and Torres Strait Islander knowledge, strength and sovereignty in a health system that achieves equity for Aboriginal and Torres Islander people affected by cancer

5-year goals

Maximising cancer prevention	Enhanced consumer experience	World class health systems for optimal care	Strong and dynamic foundations	Workforce to transform the delivery of cancer care
Culturally-safe behavioural and screening approaches to reduce cancer risk are embedded, and evidence-based and personalised cancer prevention and screening strategies are incorporated into standard of care	Personalised models of navigation and cancer care are widely available to all Australians affected by cancer - engaging consumers in culturally safe, equitable and responsive cancer care, and driving re-orientation of health service systems, including training and distribution of cancer health workforce	Networked high quality comprehensive health service systems that deliver optimal cancer care and better outcomes	A national cancer data ecosystem supporting and informing evidence-based, innovative models of care which incorporate national uptake of advanced technology and infrastructure, underpinned by world-class research, and where participation in clinical trials is standard of care	Strategies implemented to enable a culturally safe, responsive, and capable multidisciplinary workforce that is working to the full scope of practice and able to deliver high-quality cancer care

Achieving equity in cancer outcomes for Aboriginal and Torres Strait Islander people

Priority is given to accountability for the delivery of culturally safe services by all health professionals; training opportunities and support programs are established for Aboriginal and Torres Strait Islander health professionals in the cancer sector

2-year goals

Maximising cancer prevention	Enhanced consumer experience	World class health systems for optimal care	Strong and dynamic foundations	Workforce to transform the delivery of cancer care
Access to culturally-safe behavioural and screening approaches to reduce cancer risk is improved, and evidence-based and personalised cancer risk assessment strategies are identified	Person-centred models of integrated navigation and cancer care - including supportive care, information and support, and open communication, are nationally defined, co-designed and developed, to incorporate culturally safe cancer care - and are tested with consumers	Frameworks for high quality comprehensive health service systems established to deliver better cancer care and improved outcomes	Nationally agreed frameworks for collection and reporting of comprehensive and linked cancer and health data, integration of new technologies into routine cancer care, informed by evidence-based research priorities driving innovation and quality improvement, and for maximizing / streamlining recruitment to cancer clinical trials in Australia	National strategies developed to enhance clinical and cultural safety training and accreditation processes, build workforce diversity, expand multidisciplinary roles, and determine retention strategies

Achieving equity in cancer outcomes for Aboriginal and Torres Strait Islander people

Collaborative partnership and cross sector approaches are developed and enhanced at the system, service and individual level; Individual and institutional racism, and discrimination across cancer services is identified and addressed
