

# The Australian Cancer Plan

## Maximising Cancer Prevention and Early Detection

A cancer control system that seeks to eliminate racism, proactively reduces cancer risk and supports all Australians to access personalised, evidence-based cancer prevention and early detection strategies

Culturally safe prevention and screening approaches to reduce cancer risk are embedded, and evidence-based and personalised cancer prevention and screening strategies are incorporated into standard of care

Strengthen the policy and regulatory environment to address known modifiable lifestyle factors and social, cultural, and commercial determinants of health

Develop a policy framework for genomic screening

Implement new, and improve existing, evidenced-based, risk-stratified cancer screening programs

Expand access to culturally safe and responsive immunisation programs to reduce risk of cancers, including in partnership with Aboriginal Community Controlled Health Services and community-led priority population groups

Increase access to and uptake of health assessments through Medicare for cancer prevention and early detection for Aboriginal and Torres Strait Islander people

## Enhanced Consumer Experience

People affected by cancer are partners in culturally safe, equitable and responsive cancer care, and health services and systems are trusted and supported for optimal experience, quality of life and cancer outcomes

Personalised models of navigation in cancer care are widely available to all Australians affected by cancer – engaging consumers in culturally safe, equitable and responsive cancer care and driving re-orientation of health service systems, including training and distribution of cancer health workforce

Evaluate, adapt and scale nationally, integrated care navigation models across the cancer care continuum

Require health services to provide co-designed, culturally responsive resources to enable healthcare providers to communicate respectfully with consumers

Ensure multidisciplinary cancer care teams for Aboriginal and Torres Strait Islander people are trauma aware and healing informed

## World Class Health Systems for Optimal Care

Integrated, coordinated, data-driven, high quality health service systems that consistently deliver optimal cancer care and excellence in outcomes

Networked high-quality comprehensive cancer care systems that deliver optimal cancer care and better outcomes

Integrate optimal care pathways (OCPs) as routine cancer care using a monitoring and evaluation system that links the implementation of OCPs to patient outcomes and experience

Improve equitable access to evidence-based, innovative models of integrated multidisciplinary care across the cancer continuum

Establish a National Comprehensive Cancer Centre Network (NCCCN) to increase equity of access across services for all patients and monitor evidence-based system performance

Pilot and implement sustainable approaches to improve access to accepted, traditional healing practitioners within cancer services to enable an integrated, trauma-informed oncology approach for Aboriginal and Torres Strait Islander consumers

## Strong and Dynamic Foundations

A modern, fit for purpose cancer control infrastructure, advanced by the innovative application of technology, research, and data to improve Australia's cancer outcomes

A national cancer data ecosystem supporting and informing evidence-based, innovative models of care which incorporate national uptake of advanced technology and infrastructure, underpinned by world-class research, and where participation in clinical trials is standard of care

Expand access to digitally enabled cancer care to improve equity and access to quality cancer care, particularly in regional, rural and remote areas

Explore and test innovative approaches to pool and redirect funding to address areas of need in cancer care

Design and embed patient reported experience and patient reported outcomes into national performance monitoring and reporting for all providers, to assess services for all population groups and establish an evidence base

Expand the use of technology and virtual care to increase access for Aboriginal and Torres Strait Islander people and to support communities across the cancer care continuum

## Workforce to Transform the Delivery of Cancer Care

An engaged, capable, and future-focused cancer workforce that is culturally safe and responsive, well-equipped, well-supported and driven by collaboration, continuous improvement and diversity to enable inclusive care for all Australians affected by cancer

Strategies implemented to enable a culturally safe, responsive, and capable multidisciplinary workforce that is working to the full scope of practice and able to deliver high-quality cancer care

Implement a cancer care workforce pipeline that meets demand for optimal cancer care, with diversity measures in training, recruitment and talent management to ensure the cancer workforce represents the diversity of patient populations

Work with the sector to support all cancer care practitioners to practice at the top of their scope, increase retention and ensure ongoing access to continuing professional development

Routinely integrate cultural safety training programs to cancer service providers, including through community-based partnerships with priority population groups

Support national coordination and implementation of the plan to recruit, train and retain the Aboriginal and Torres Strait Islander cancer care workforce

## Achieving Equity in Cancer Outcomes for Aboriginal and Torres Strait Islander People

Supporting Aboriginal and Torres Strait Islander knowledge, strength and sovereignty in a health system that achieves equity for Aboriginal and Torres Strait Islander people affected by cancer

Priority is given to accountability for the delivery of culturally safe services by all health professionals; training opportunities and support programs are established for Aboriginal and Torres Strait Islander health professionals in the cancer sector

Establish ongoing place-based engagement with Aboriginal and Torres Strait Islander people to understand emerging needs across the cancer care continuum

Implement strategies to embed culturally safe care within cancer-related services, for Aboriginal and Torres Strait Islander people

Access to culturally safe prevention and screening approaches to reduce cancer risk is improved, and evidence-based and personalised cancer risk assessment strategies are identified

Deliver cancer prevention and health promotion activities, including healthy lifestyles, immunisation, and population screening participation, co-designed and tailored to a range of settings

Strengthen cancer prevention in broader health strategies and public health partnerships

Promote translational research on the impact of social, cultural, and commercial determinants of health on cancer outcomes for priority populations to inform policy and practice

Undertake ongoing assessment of the evidence for risk-based, cost-effective population cancer screening

Strengthen health literacy for Aboriginal and Torres Strait Islander people through co-designed health promotion and lifestyle strategies for cancer prevention

Person-centred models of integrated navigation in cancer care are nationally defined, co-designed, developed and tested with consumers, to incorporate culturally safe cancer care

Develop a national framework for and pilot integrated multi-channel, multi-disciplined navigation models that ensure the right support at the right time for every consumer across the cancer continuum

Improve availability of co-designed, tailored information and care for consumers, to improve health literacy and reduce cancer-related stigma

Support health services to provide co-designed, culturally responsive resources to enable healthcare providers to communicate respectfully with consumers

Frameworks for high quality comprehensive health service systems established to deliver better cancer care and improved outcomes

Develop and implement a national framework that standardises the development, update, evaluation and uptake of optimal care pathways, including for priority population groups

Pilot innovative, evidence-based models of care for people living with and beyond cancer

Develop and refine integrated care models to maximise access to high-quality, timely and evidence-based palliative and end of life care

Develop a national framework for networked comprehensive cancer care, including the role of comprehensive cancer centres to enhance patient outcomes, strengthen transparency and accountability, and drive continuous improvements

Lead a national approach to identifying and reporting Indigenous status in all pathology requests (with appropriate consent)

Nationally agreed frameworks for collection and reporting of comprehensive cancer data, and implementation of new technologies into routine cancer care, with a focus on research priorities that drive innovation and fast-track opening of cancer clinical trials in Australia

Develop an agreed national cancer data framework to improve accessibility, consistency and comprehensiveness of integrated data assets

Ensure targeted and innovative research investment into areas of unmet and emerging need; and improve clinical trial design and equitable access

Identify opportunities to improve equitable cancer care through the digital health ecosystem

Establish Aboriginal and Torres Strait Islander-led initiatives which strengthen Aboriginal and Torres Strait Islander data sovereignty and governance of cancer data

National strategies developed to enhance clinical and cultural safety training and accreditation processes, build workforce diversity, expand multidisciplinary roles, and determine retention strategies

Identify current and emerging workforce undersupply in line with cancer workforce modelling and other national health workforce strategies, and initiate planning with the sector towards building future workforce capacity and capability

Build on existing capability of the primary care workforce to collaboratively and sustainably support the needs of consumers

Evaluate and extend cultural safety training programs to cancer service providers, including through community-based partnerships with priority population groups

Identify priority areas of need for Aboriginal and Torres Strait Islander cancer care workforce, and develop a plan to recruit, train and retain the Aboriginal and Torres Strait Islander cancer care workforce

Collaborative partnership and cross sector approaches are developed and enhanced at the system, service and individual level; Individual and institutional racism, and discrimination across cancer services is identified and addressed

Embed the Aboriginal and Torres Strait Islander voice in policymaking on cancer prevention, care delivery and standards through leadership, collaboration and co-design process

Strengthen collaboration with service providers, regulation authorities and the Aboriginal and Torres Strait Islander cancer workforce to establish clear accountability for culturally safe care and compliance with national standards

Establish and enhance collaborative partnerships with communities and Aboriginal and Torres Strait Islander-led organisations
